VOL. 87

INTRODUCTION OF NEW DATSUN SPORTS CAR 1968 MODELS SR(L)311-(U), SP(L)311-(U)

NISSAN MOTOR CO., LTD.

TOKYO, JAPAN

FOREWORD

The DATSUN SPORTS 2000 and the DATSUN SPORTS 1600 have been, to a great extent, changed with the aim of achieving the ultimate in safety.

The main alternation therefore is made in accordance with the America Safety Standard.

It is suggested that dealers sales and service personnel read this Bulletin so they may be familiar with the design and performance of this car.

These modifications and improvement outlined in this publication have been applied from the following chassis numbers.

SP311 - 03001 -

SPL311 - 17001 -

SR311 - 01001 -

SRL311 - 01001 -

1. ENGINEERING FEATURES

1-1 Series identifications

The feature of the DATSUN SPORTS 2000 is same to the 1600 except the emblem, front grille and engine.

DATSUN SPORTS 2000 Fig. 2

1-2 Styling

The external view of new DATSUN SPORTS has not been changed. The windshield is however altered the details of which will be described later.

1-3 Interior and instrument

The instrument panel, windshield frame, sunvisor and center console are fully padded with thick and resilient foam.

The instrument panel is completely new and features the recesses, housing instrument, heater control provision and clock.

Large exact-reading instrument and gauges are conveniently grouped and give accurate, at-a-glance readings. Driving controls, switches, instruments and gauges are arranged for maximum control efficiency and convenience.

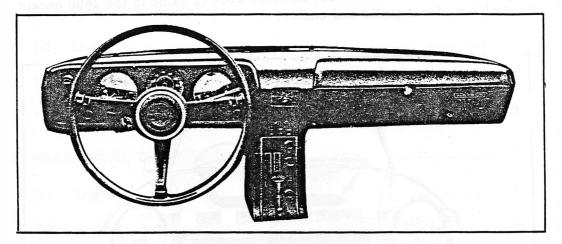

Fig. 3

The steering wheel including horn button and spoke padded fully is completely new and incorporates a collapsible steering column to telescope up to 150 mm (5.9 inches).

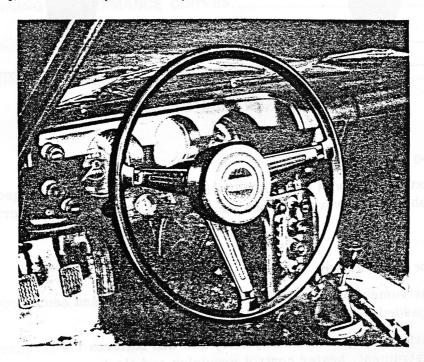

Fig. 4

Separate housing beneath instrument panel contains choke knob, brake safety light check switch, heater switch (optional), hazard warning switch (optional) and radio (optional).

Heater controls are padded with resilient foam. Powerful heater defrosting system according to American Safety Standards gives maximum comfort.

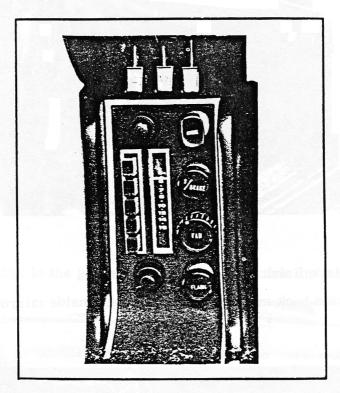

Fig. 5

1-4 Other features

1. Brake safety light switch

The brake safety light is newly adopted as one of safety features in addition to the current dual hydraulic brake system. The brake safety light indicates if there is a drop in pressure in dual master cylinder system.

To check the brake safety light for proper operation, the brake safety light switch is equipped on the center console.

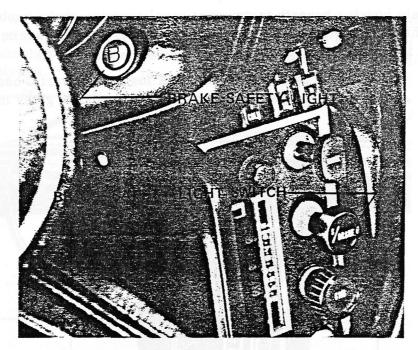

Fig. 6

- 2. Reduced-glare finish for glazing surfaces.
- 3. Larger inside back mirror and break-away inside mirror stay.

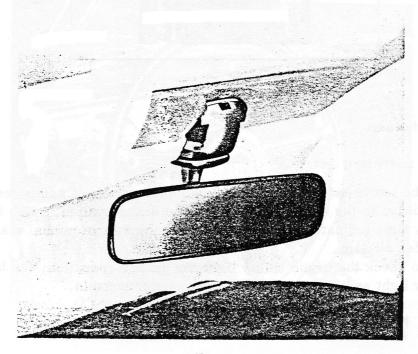

Fig. 7

4. Padded windshield frame.

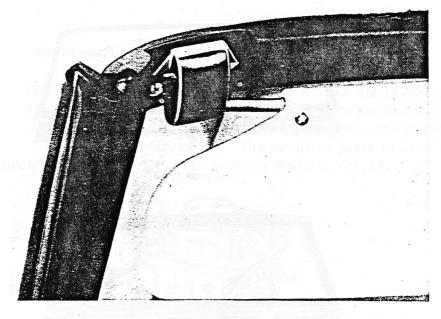

Fig. 8

5. Fuse box in the glove box for easy inspection and replacement.

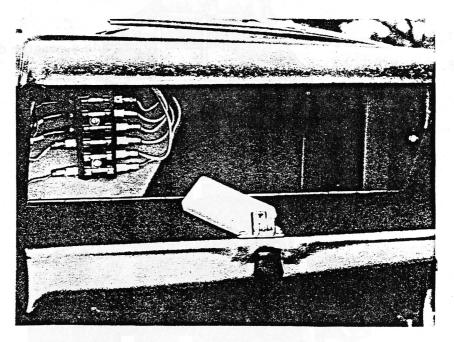

Fig. 9

6. Tandem type two speed windshield wiper.

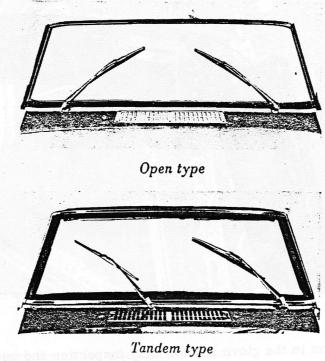

Fig. 10

- 7. Improvement in quality of top canvas to provide a greater durability.
- 8. Roll bar and headrests are available as optional part.

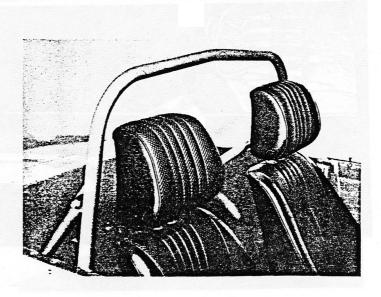

Fig. 11

2. MECHANICAL COMPONENTS

2-1 Engine

Nissan Air Injection System (only to U.S.A.)

The DATSUN SPORTS CAR is equipped with Nissan Air Injection System (N.A.I.S.) which had been already introduced in the Service Bulletin Vol.79. As to the detailed technical information, the Service Bulletin Vol.79 should be referred to. The modified parts of each model are mentioned at page 21 ~ 24 of the Service Bulletin Vol.84.

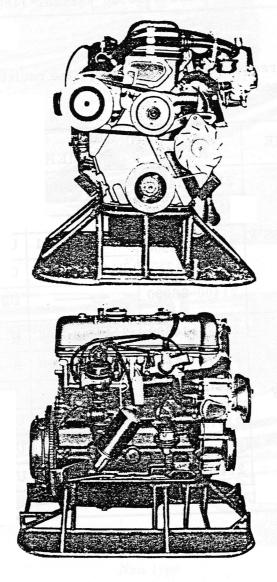

Fig. 12 U20 Engine for SRL311U

2-2 Chassis

1. Fuel tank

To protect the fuel tank movement and damage in the event of the collision, the fuel tank attaching bracket is reinforced and the construction of the fuel tank is changed.

PART NAME	PART N	INTERCHANGE	
PARI NAME	NEW	FORMER	ABILITY
ASS'Y-TANK, fuel	17201-25900	17201-14602	No

2. Radiator

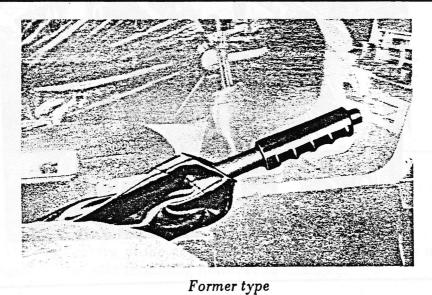

To increase a cooling efficiency, the radiator and shroud have been changed.

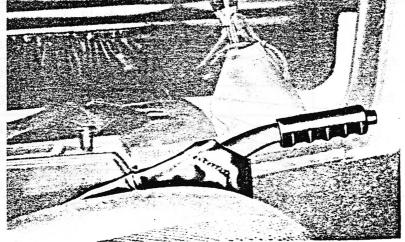

PART NAME	PART N NEW	UMBER FORMER	REMARKS
	21400-14602	21400-14601	R-engine
	21400-14701		R-engine For U.S.A.
RADIATOR ASS'Y	21400-25900	21400-25501	U20-engine R.H.D.
. Boil bar and head		21400-25600	U20-engine L.H.D.
	21400-26000	partition (file	U20-engine For U.S.A.
	21475-14600	21475-16300	R-engine R.H.D.
	21475-14701	21475-14700	R-engine L.H.D.
SHROUD ASS'Y	21475-14702		R-engine For U.S.A.
	21475-25901	21475-25501	U20-engine R.H.D.
		21475-25600	U20-engine L.H.D.
	21475-26000		U20-engine For U.S.A.
INTERCH	ANGEABILITY	: No	

3. Hand brake

The shape of the hand brake lever has been changed for the safety.

PART NAME	PART NU NEW	INTERCHANGE- ABILITY	
ASS'Y-CONTROL, hand brake	36010-25900	36010-25500	No

New type Fig. 13

4. Steering column

Collapsible steering column has been newly adopted for the safety and it telescopes up to 150 mm (5.9 inches) under severe impact.

As regards the details, refer to Service Manual "EMISSION CONTROL SYSTEM AND SAFETY DEVICE".

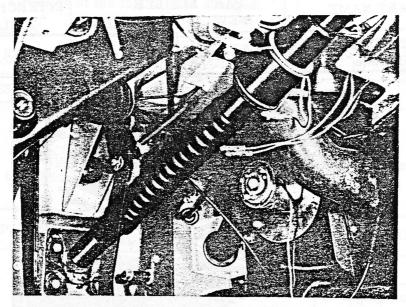

Fig. 14

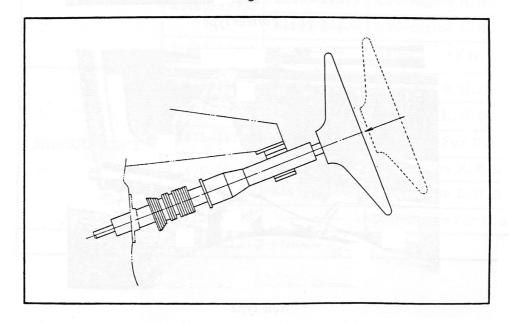

Fig. 15

2-3 Body

1. Body construction

To absorb large amounts of energy in the event of a collision, the frame and body construction has been modified, whereby the passenger compartment will be protected.

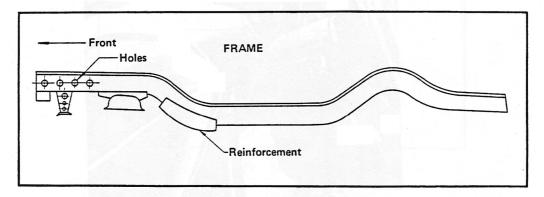

Fig. 16

2. Body color

The body colors of the new DATSUN SPORTS CAR have not been changed. The seat trimming however is changed.

Color code	Body color	Upholstery color
505	Black	
531	Yellowish Gray (metallic)	
563	Sky Blue	Black
655	White	Red
664	Red	
665	Yellow	
666	Light Gray (metallic)	

3. Instrument panel

The instrument panel is fully padded with thick and resilient foam. Every metal parts located before the driver's eye have nonglare surfaces in order to avoid adversely the driver's ability to see.

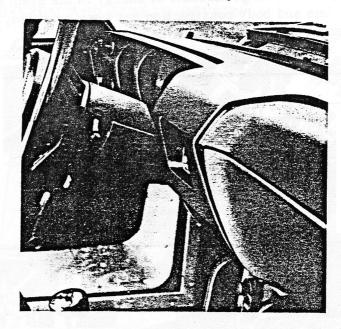

Fig. 17

To identify the location of the switch knob, the name of the electric unit which is connected to each switch has been marked on every knob.

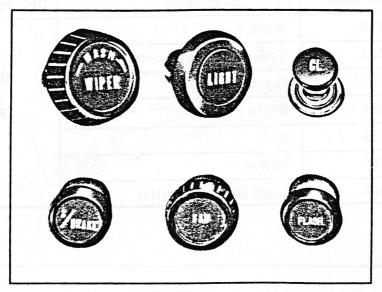

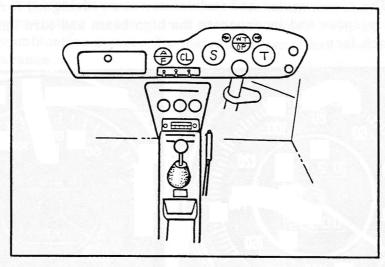

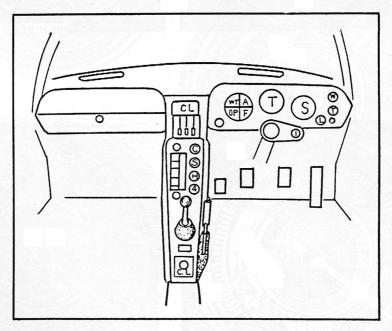

Fig. 18

The control switch and meter are realigned for easy operation and exact reading.

Former type

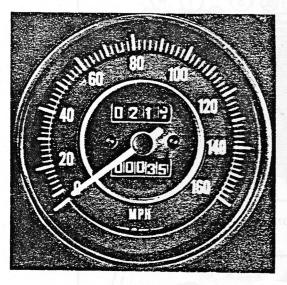

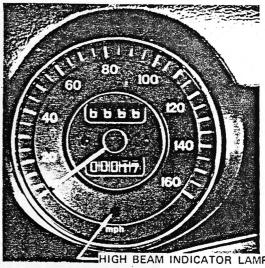

New type

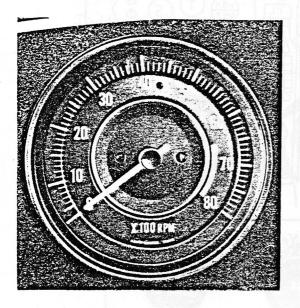

Fig. 19

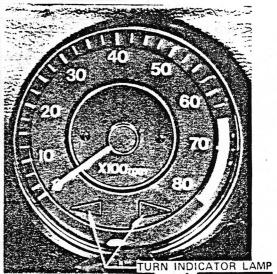

4. Speedometer

The speedometer and tachometer are redesigned for easy-toread purpose and incorporate the high beam and turn indicator lamp on each face.

Former type

New type

Fig. 20

5. Combination meter

The combination meter consists of the ammeter, fuel meter, water temperature meter and oil pressure meter. By the adoption of this combination meter, the instrument panel has been refreshed in appearance.

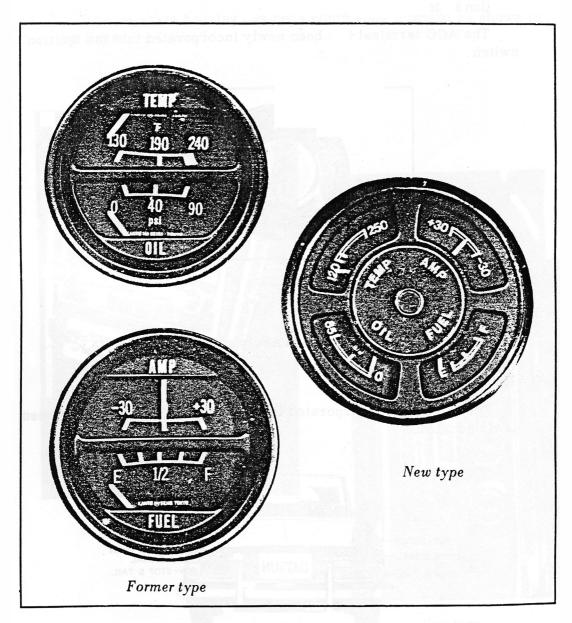

Fig. 21

6. Brake safety light

The brake safety light which is newly adopted, indicates if there is a drop in pressure in dual master cylinder brake system. To check the brake safety light for proper operation, the brake safety light switch is equipped on the center console. (see Fig. 6)

7. Ignition switch

The ACC terminal has been newly incorporated into the ignition switch.

Fig. 22

8. Audible flasher

The audible flasher has been newly adopted for the safety.

9. Tail lamps

The tail lamps incorporated into the turn signal lamps have been newly adopted.

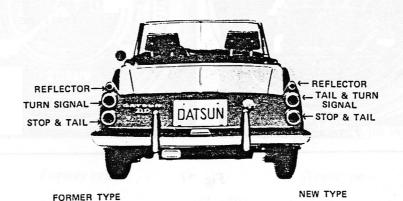

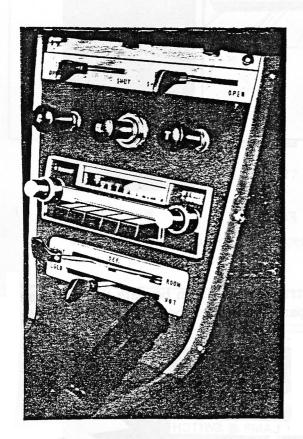

Fig. 23

10. Fuse box

It is easy to inspect and replace fuse because the fuse box is set in the glove box. (see Fig. 9)

11. Separate housing

The separate housing has been completely changed as shown in the figure.

Former type

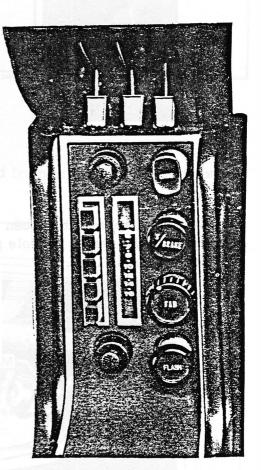

Fig. 24

New type

12. Cigarette lighter

The cigarette lighter is combined with the ash tray on the floor console.

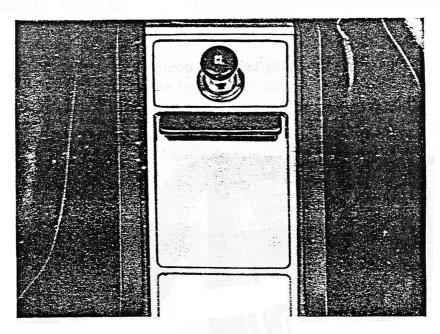

Fig. 25

13. Map lamp

The map lamp has been transferred from beneath the instrument panel to the center console panel and it can be operated by pushing the map lamp lens.

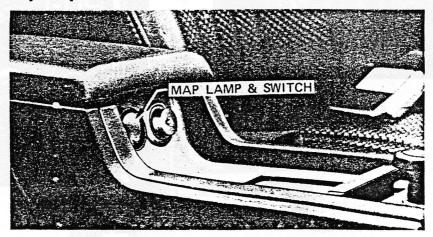

Fig. 26

14. Windshield glass

The windshield glass is enlarged $25\ \mathrm{mm}$ (0.98 inch) in height for more satisfactory view.

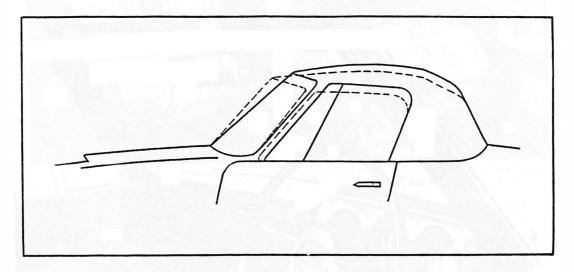

Fig. 27

15. Windshield frame

The windshield frame is changed from the sash type to the panel type having greater rigidity.

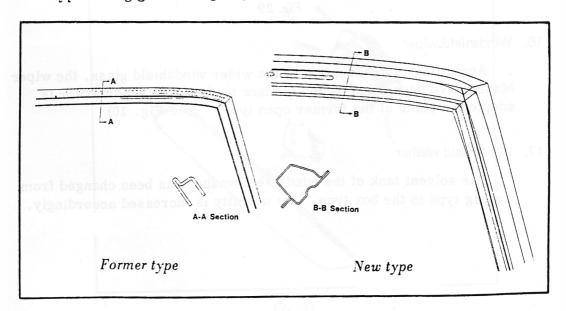

Fig. 28

Also the soft resilient foam is padded as the front pillar and windshield trimming.

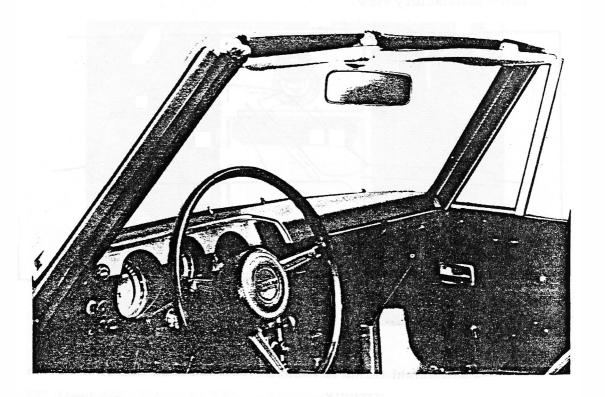

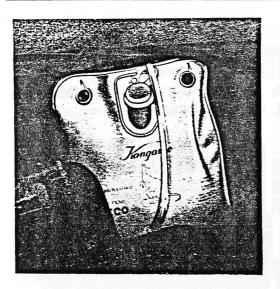

Fig. 29

16. Windshield wiper

According to the adoption of the wider windshield glass, the wiper blades have been changed and the new tandem type wiper motor is adopted in place of the former open type. (see Fig. 10)

17. Windshield washer

The solvent tank of the windshield washer has been changed from the bag type to the box type. Its quantity is increased accordingly.

Former type

Fig. 30

New type

18. Rear view mirror

To secure a good rear view, the size of inside mirror has been widened about 30 percent and the shape of outside mirror is changed A special break-away type mirror has been adopted at the windshield frame as the inside rear view mirror.

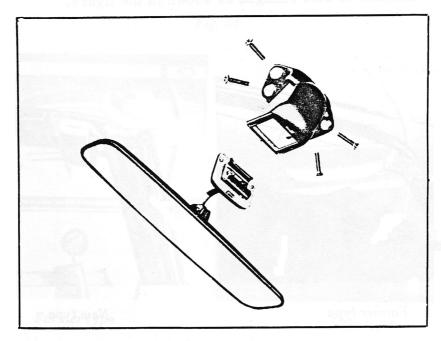

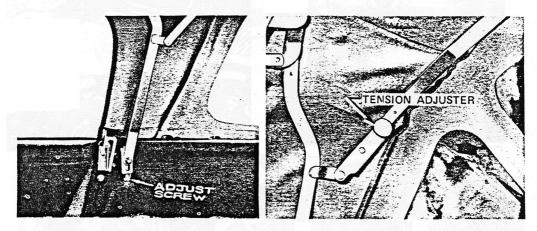

Fig. 31

19. Soft top

To provide a greater durability, the material of the soft top is changed from cloth to the vinyl chloride canvas.

The tension adjuster is also changed as shown in the figure. Its function however is almost same as the former type.

Former type

Fig. 32

New type

20. Soft top jaw fastener

According to the car safety arguments in the U.S.A., the soft top jaw fastener is also changed as shown in the figure.

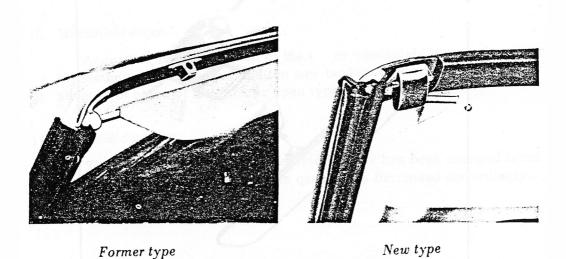

Fig. 33

21. Door handle

The inside and outside handles of the door have been changed. The inside pull handles are padded with leather touch resin. The rubber knob has been adopted in the inside regulator handle. The outside handle has also been changed from the push type to the pull type.

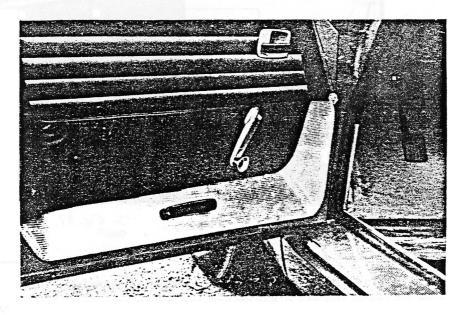

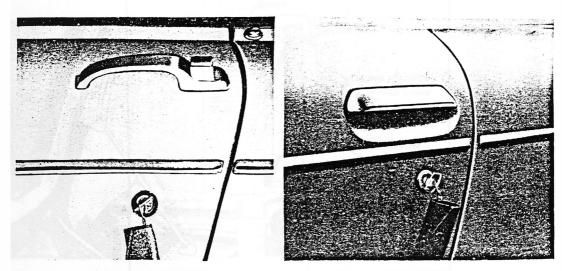

Fig. 34

Former type

New type

Fig. 35

22. Door ventilator

As one of the safety features, the door ventilator has been abolished. The air flow capacity of the cowl ventilator has been increased and it ventilates the car interior with enough fresh air by controling the cowl ventilator lever.

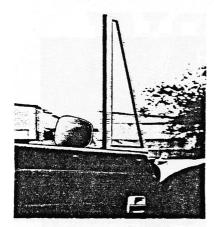

Fig. 36

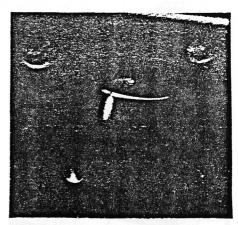

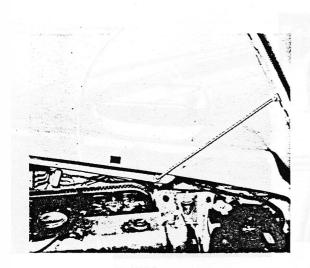

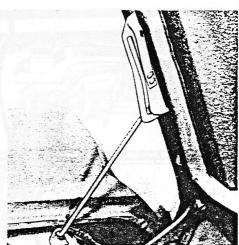

Fig. 37

23. Engine hood

The engine hood support guide has been changed as shown in the figure whereby the air cleaner and the other parts can be easily inspected.

Former type

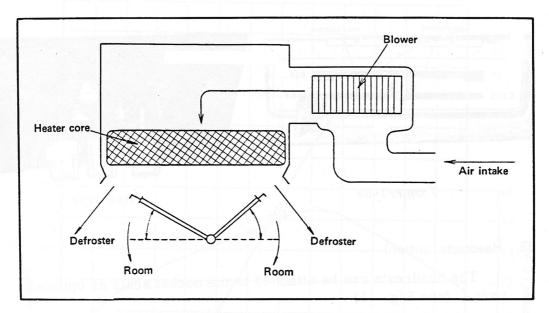

New type

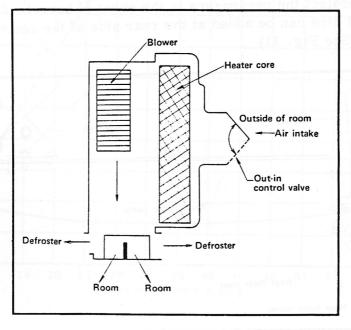

Fig. 38

24. Heater

The arrangement of the blower and core is changed as follows.

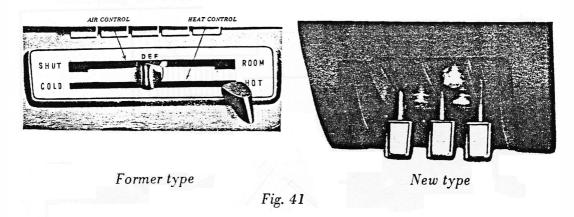

Former type Fig. 39

New type Fig. 40

The OUT-IN control valve has been newly adopted for the purpose of getting a better heating efficiency.

25. Headrests (option)

The headrests can be attached to the bucket seats as optional part. (see Fig. 11)

26. Roll bar (option)

To protect the passengers in the event of barrel roll of the car, the steel pipe can be added at the rear side of the seats as optional part. (See Fig. 11)
